

DELHI PUBLIC SCHOOL KAMPTEE ROAD, NAGPUR

WATER CYCLE ACTIVITY

27TH AUGUST, 2026

The young learners of Preparatory, Delhi Public School Kamptee Road, enthusiastically participated in a delightful Water Cycle Activity, transforming an important scientific concept into an engaging and memorable learning experience. With vibrant colours, creative ideas and eager hands, the children crafted imaginative models depicting the fascinating journey of water through nature. Through this hands-on endeavour, they explored the three fundamental stages of the water cycle—evaporation, condensation and precipitation and developed a deeper understanding of how water continually circulates in our environment.

The activity served as a beautiful confluence of learning, creativity and joyful participation. It not only strengthened the children's conceptual understanding but also nurtured their imagination, curiosity and confidence. The involvement of parents added a special dimension to the experience, providing a wonderful opportunity for children and parents to learn, create and discover together. Overall, the activity transformed classroom learning into an enriching and interactive experience, leaving the young learners with a lasting appreciation of the remarkable journey of water in nature.
