

Dear Parent,

Knowledge is Power

School is the basic foundation of knowledge being imparted to a child. It gives a chance to children to acquire knowledge on various fields of education, such as people, literature, history, mathematics, politics, and other numerous subjects. By obtaining knowledge, a person is in a better position to help other people.

A good school:

- Gives your kid a better and wider perspective.
- Gives your kid a good environment to learn.
- Gives your kid comprehensive education.

With these words I would like to thank you for your wonderful and continuous cooperation and support in maintaining the school standards in overall learning throughout the year. We have been trying to bring the academic back on track, post pandemic. The school is pushing for the summer break so it is important that the child is in connect with the academic along with spending quality time with the family. Since it is the starting of the session I would like to suggest you to attend all the upcoming PTMs. Kindly suggest us as how we can make our system safer and positive for students.

Therefore we have planned some practice work for your ward. It will support your ward in following ways.

1. It improves your child's thinking and memory
2. It helps your child develop positive study skills and habits that will serve him or her well throughout life
3. It encourages your child to use time wisely
4. It teaches your child to work independently
5. it teaches your child to take responsibility for his or her work
6. It allows your child to review and practice what has been covered in class
7. It helps your child to get ready for the next step of learning
8. it helps your child learn to use resources, such as libraries, reference materials, and computer Web sites to find information
9. It encourages your child to explores subjects more fully than classroom time permits
10. It allows your child to extend learning by applying skills to new situations. It helps your child integrate learning by applying many different skills to a single task, such as book reports or science projects

I am sure being an aware stakeholder in the system you will help in building above mentioned skill in the child.

Looking forward for your co-operation.

Thanks and regards

Dhirendra Harbola

Principal

Jaycees public school
