One Step Towards Green and Clean Energy

By-Kavya Sharma

"Energy is a force which drives life."

In the journey to achieve the ambitious goal of making India a 5 trillion-dollar economy the country is making tremendous strides in ensuring an affordable, sustainable and secure energy spectrum to fuel robust economic growth. Energy efficiency is a key step in reducing our impact on climate change and creating a sustainable energy future.

*'Take steps towards conservation
Save fuel, control pollution.'*

Adoption of cleaner fuels is the key for enhancing self-reliance in energy sector. It is imperative that adequate emphasis is laid on switching to cleaner forms of energy and simultaneously work on the measures to enhance energy efficiency.

Clean Energy-Clean energy works by producing power without having negative environmental impacts, such as

THE GOOD IN EVERY EVIL

BY : AROOSA HODA

We were stuck with our busy lives,
With no family ties,
Running after money
Thought it would make everything sunny.

Then came 2020
With the pandemic,
The whole world static
and the change was drastic
and the realisation felt an epic.

This year made us realise that we were humans
who had family and friends,
Dawning on the truth that
Once they are gone
Nothing material can replace them.

We learnt how to compromise
and now we know,
That even a little would suffice.

Don't lose hope
and pray to Almighty
For everyone to be happy and safe,
as he alone can end this with his grace.

Don't be depressed and stressed
These are days which are blessed.
There is good in every evil.
It taught us to love, to care, to respect and to help people.

ONE STEP TOWARDS GREEN AND CLEAN ENERGY

"Nature provides a free lunch, but only if we control our appetites."
By Sonia

-William Ruckelshaus

As the famous adage goes "there is no rose without a thorn" and the same applies to non-renewable energy, with one hand it gives us enough power to sustain our lives on this planet and when misused or overused, it also holds the power to take away the clear skies and essentially our FUTURE.

Also, according to scientists energy demand is projected to grow by 50% by 2025. Out of the total energy used by human beings, 80% comes from fossil fuel, which stands as a limited, non-renewable and polluting resource. But it seems that all this hardly matters as, humans have turned a blind eye and deaf ears to the reality, overlooking the screams of the nature and ignoring the signs of approaching apocalypse.

The reason for all the destruction in the nature is the overuse of these fossil fuels and all this is because of human lust towards its motives. And this will lead us to a situation where all the non-renewable sources of energy will go scarce and the earth will sink into darkness as there will be no energy to light up our homes, no to cook our food, and absolutely no energy to run engines or cars or factories, and all this will result to nothing but the END OF THE WORLD!!

Even the forethought of such a situation is enough to witness nature's wrath.

LOVE YOURSELF

"Be free."

"Be frail."

All they say.

But haven't they seen
the monochrome despair
that haunts the teens.

"Be pretty,"

Cause that's the norm of the committee.

Pretty, an adjective.

But now a prison,
they put us in.

A six letter word
that's now enough
to decide the worth of a girl.

Just because we aren't like those mass produced dolls of yours,
it doesn't mean we aren't good enough.

We are not pretty.
We are unique. Beautiful.

'Beautiful' is not our body,
But,

'Beautiful' is the spark in our eyes.

'Beautiful' is the casual smile given so freely,
a tenderness of the soul that loved so deeply.

'Beautiful' is the story of the innermost pages of our soul,
it's not something which could be put into words or forms,
it is something which is felt.

God made us different.

And that's the reason why the world is colorful!
ing colorblind and embrace the vibrant colors tinting the canvas of the world.

Remember that it takes different leaves to make the autumnal forest enchanting.

We are proud of each one of these students and wish them success in all future endeavours.

We would also like to acknowledge the hard work and guidance of **all the Teachers In-charges** and hope they will continue to inspire students to participate in many more competitions in the future.

Best Wishes
Mother Mary's Fraternity
