Precautionary Measures in View of Rising Air Pollution Levels

Dear Parent,

Greetings !

In view of the prevailing air pollution levels in the region, the school is taking necessary precautions to safeguard the health and well-being of our students and staff.

Please note that the school will remain open and function as per the regular schedule. However, we will be taking the following precautionary measures:

1. Wearing of Masks: Students are advised to wear well-fitted masks while commuting to and from school. They may also wear masks within the school premises.

2. No Outdoor Activities: All outdoor activities, including assemblies, sports and physical education classes will remain suspended until further notice. These will be conducted indoors wherever feasible.

3. Health Concerns: Parents are requested to ensure that children who are experiencing symptoms such as coughing, breathing discomfort, throat irritation or other respiratory issues seek appropriate medical advice and remain at home if unwell.

We request parents to reinforce these precautions at home and ensure that children carry their masks to school.

Thank you for your understanding and cooperation.

Warm regards

Ms. Neelu Singh
Principal
The DLF School Ridge Valley
