

Shambhu Dayal Global School

Class 4

SUBJECT

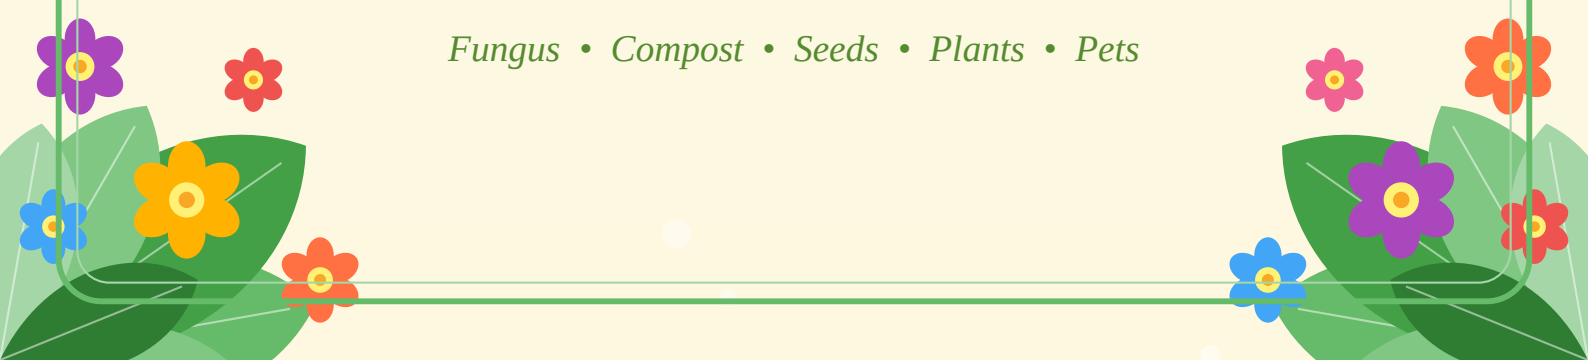

Nature & Nurture

Monthly Activity Report

(April to September)

Fungus • Compost • Seeds • Plants • Pets

April Activity

Fungus on Bread

Aim: To observe how fungus grows on bread and understand the conditions needed for its growth.

Learning Outcome: Students learn that microorganisms grow in suitable conditions like warmth and moisture.

They develop observation and recording skills.

May Activity

Compost Making

Aim: To learn how kitchen and garden waste can be converted into useful compost.

Learning Outcome: Students understand the importance of recycling organic waste.

They develop eco-friendly habits and care for the environment.

July Activity

Germination of Seeds

Aim: To observe how a seed grows into a young plant under suitable conditions.

Learning Outcome: Students understand that seeds need water, air and suitable warmth to germinate.

They develop patience and observation skills.

August Activity

Activity - My Own Plants

Aim: To encourage students to grow and take responsibility for their own plants.

Learning Outcome: Students learn the basic needs of plants such as water, sunlight and care.

They develop responsibility and love for nature.

September Activity

Learn How to Care for Pets at Home

Aim: To understand how to keep pets safe, healthy and happy at home.

Learning Outcome: Students learn about providing pets with food, water, cleanliness and gentle care.

They develop kindness, empathy and responsibility towards animals.
