

Shambhu Dayal Global School

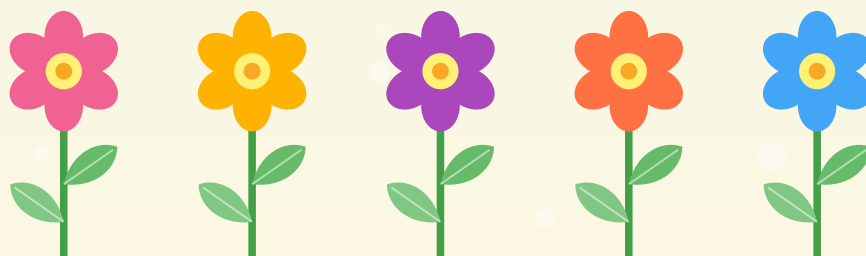

Class 3

SUBJECT

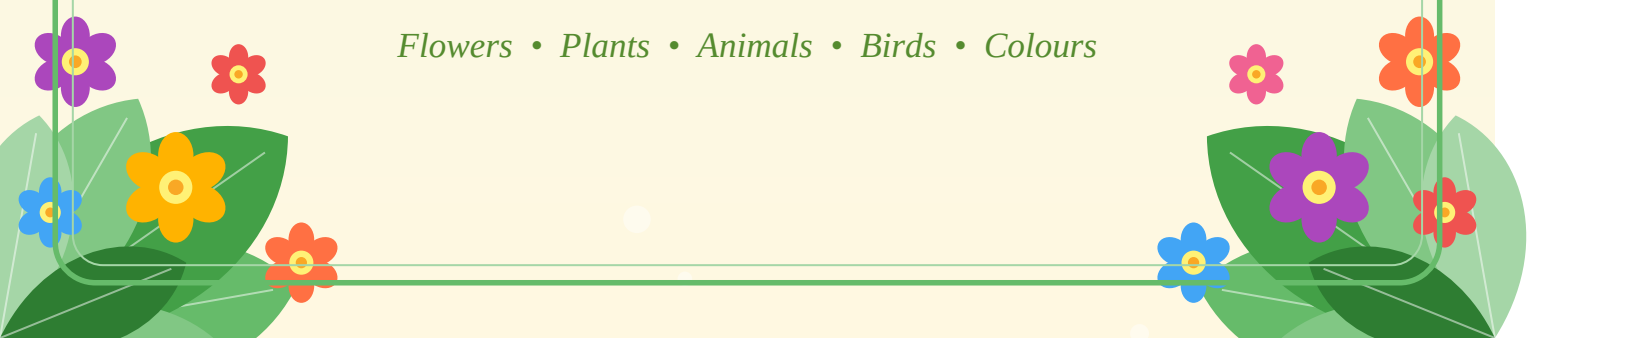

Nature & Nurture

Monthly Activity Report

(April to September)

Flowers • Plants • Animals • Birds • Colours

April Activity

Know about different types of flowers

Aim: To help students identify and learn about different types of flowers.

Learning Outcome: Students will be able to name, observe, and describe common flowers.

They will understand the importance of flowers in nature.

May Activity

Learning to grow plants

Aim: To teach students the basic steps of growing and caring for plants.

Learning Outcome: Students will learn about seeds, soil, water, sunlight, and plant growth.

They will develop responsibility and care towards plants.

July Activity

Animals Habitat

Aim: To help students understand where different animals live.

Learning Outcome: Students will be able to identify animals and their habitats.

They will understand how habitats provide food, water, and shelter.

August Activity

Making Own Bird Feeders

Aim: To encourage students to care for birds by making simple bird feeders.

Learning Outcome: Students will learn about birds' food needs and how to support them.

They will develop kindness and responsibility towards living beings.

September Activity

Learning Tie & Dye

Aim: To introduce students to the creative art of tie-dye using simple techniques.

Learning Outcome: Students will learn how colours and patterns are created on fabric.

They will develop creativity, hand skills, and an appreciation for traditional art.
