Exploring Science Beyond the Classroom – Educational Trip to Delhi

Sehwag International School organized an educational trip for students of Classes 9 to 12 to the National Science Centre, Delhi, aimed at enhancing scientific knowledge, observation skills, and practical understanding beyond textbooks.

On arrival, students were warmly welcomed and guided through the centre's interactive sections, including physics, biology, space science, energy, robotics, and information technology. Highlights of the visit included hands-on experiments, working models, and a captivating 3D film show that made complex concepts engaging and fun.

Students also explored the Human Biology Gallery, Fun Science Gallery, and the Energy Ball, which encouraged critical thinking and helped connect theory with real-life applications. Teachers ensured active participation, prompting students to ask questions, discuss ideas, and develop a deeper curiosity for science.

The trip was not only informative but inspiring, motivating students to innovate and consider future careers in science and technology. The day concluded with a reflection session, where students shared their experiences and learnings.

Where words create worlds

Adventure is a heartbeat of exploration

Adventure doesn't always require grand gestures.

It can be as simple as
saying yes to a new experience or facing a fear.
It's about breaking free
from routine. It involves daring to dream and
discovering stories in the
unexpected situation. In every adventure, big or
small, we discover not
just the world but ourselves.

Books are my best friends

Books are a human's best friend. It is very useful and important to
read

books, as they improve vocabulary as well as your reading skills.

You

can learn English and other languages through reading too. I am
very

keen on reading books; I have seen and felt the improvement in my
English after I started reading books. My favorite series of books is

'The

Famous Five.' This series is full of mysteries and adventure; that's
why I

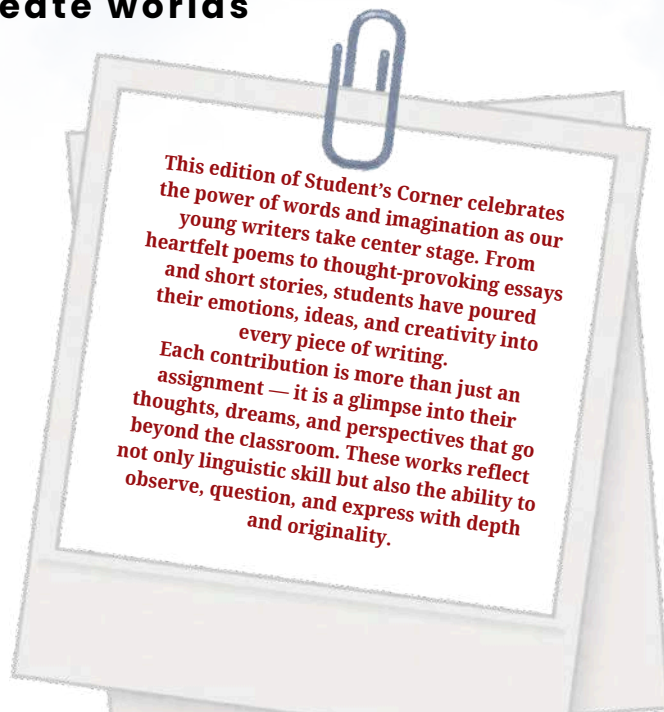

am truly obsessed with it. My favorite author is Enid Blyton. All of
her

books are related to magic, mystery, etc.

I was inspired by my elder sister, she read storybooks all the time
when

she was my age. In my opinion every child should read books both in
Hindi and English. I hope that everyone creates a hobby of reading
books like me.

In the hush where twilight lingers,
Where shadows kiss the fading light,
The earth exhales a silent whisper,
A hymn of love, both dark and bright.
The rivers carve their endless longing,
Through ancient stone and weary clay,
A Lover's touch, forever reaching,
Yet never meant to truly stay.

The forests hum in solemn verses,
Their roots intervene with time's embrace,
Each leaf a fleeting, fragile memory,
A breath that fate cannot replace.
The mountains stand-unmoved, unbroken,
Yet wear the scars of passing years,
Their echoes lost in winds unspoken,
Their solitude both proud and fierce.
Oh, the nature weeps in quiet mourning,
For all that fades yet still remains,
A love that lives beyond the moment,
A song of joy, A song of pain.
