Subject: Psychometric Aptitude Assessment

Ref.No. SPS/MV/2026-2027/ 6983
Date: 06/10/2026

Dear Parents and Students
Pranam!

Aptitude plays an important role in making informed decisions regarding future academic and career pathways. Understanding a student's natural abilities, interests, strengths and areas of aptitude can help in identifying suitable academic options and making thoughtful choices for future studies and careers. A psychometric aptitude assessment provides structured insights into these areas and can serve as a valuable tool for students and parents while planning the next stage of the student's academic journey.

The assessment will be conducted **on Wednesday, 14 October 2026 in the school computer labs**, in online mode.

Students are requested to carefully note the following guidelines:

- The assessment must be completed within **75 minutes**.
- It comprises **six distinct tests**, followed by an additional set of questions.
- Students should attempt the assessment with **continuity and momentum**, without pausing or over-analysing their responses.
- In the aptitude-based sections, **only one option is correct**; students should select the most appropriate answer carefully.
- In all other sections, there are **no right or wrong answers**. Students should respond honestly and instinctively, based on their own preferences and responses.
- Accurate and complete information is essential to ensure access to the student's **personalised report**.
- Upon submission, an automated report will be generated, and students will be able to access their dashboard.
- The dashboard will provide:
    - **Four recommended career options**
    - **Two suggested academic streams**

Students are advised to approach the assessment with sincerity and answer all questions independently. The purpose of the assessment is to help students gain greater self-awareness and develop a better understanding of their academic and career preferences.

Regards,
Dr Preeti Jain
